PRODUCT TECHNICAL SPECIFICATION

28 mm Tamper-Evident Beverage Closure - Sample Supplier Datasheet

Specification item	Declared value
Product / component	28 mm tamper-evident screw closure for PET beverage bottles
Resin	High Density Polyethylene (HDPE)
Nominal wall gauge	1.10 millimetres
Nominal outside diameter	30.2 mm
Nominal mass	2.85 g
Colour	Natural / custom colour masterbatch
Intended application	Still-water and non-carbonated beverage packaging

Food-contact statement

The resin and finished closure are intended for direct contact with food and beverages and are supplied for use in beverage packaging applications.

General notes

Values in this document are nominal sample values prepared for software testing. This document is not a commercial specification and must not be used as a compliance certificate.

Why this sample is useful for parser testing

This datasheet intentionally uses wording that differs from the original MVP0 sample: "Resin" instead of "Material", "Nominal wall gauge" instead of "Thickness", and a food-contact sentence that does not use the phrase "suitable for food contact". The information is still explicit and should never be inferred if the parser does not recognize it.
